

Greetings

We have run into some issues regarding our county show. There were two roofs that collapsed at the fair-grounds during the snow storm, the lean-to facing south off of the livestock pavilion and a portion of the roof in the south swine barn.

The livestock pavilion cannot be used for the steer show. They are still assessing the structural integrity of the swine building.

The steer show and sheep show will take place on Jan 15th. at the Tech Livestock arena. Everything will have to show out of trailers. There will be no bedding allowed. The only change to the schedule is that steer weights will be due on Friday morning by 9 am. We will have 2 sets of digital scales set up to use.

There are not changes to the schedule for the sheep show. Weights due at 4PM, show at 6PM.

The swine show will be pushed back to Jan 23rd. I will send out a email on Friday afternoon with its schedule/location.

At this time the sale will be held on Jan 30th. at the livestock arena. Meal will start at 5:30, Sale starting at 6:30.

This show is going to be difficult at best to have this year. We are looking at every option that we can so that this show will run smoothly. Understand that anything you here between now and the email that we send Friday is a RUMOR. I can promise you that nothing is set in stone as far as time/location of the swine show. As soon as we have a confirmed location we will let you know.

Thanks
Michael
